On

Head & Neck Cancers

Organised by,
Government Cancer Hospital,
MGM Medical College, Indore.
Indore

Venue

Super Speciality Auditorium,
MGM Medical College,
Indore

Course Goal

"Head and neck cancer" is the term used to describe a number of different malignant tumors that develop in or around the throat, larynx, nose, sinuses and mouth.

Most head and neck cancers are squamous cell carcinomas and many of them can be cured, especially if they are found early. Although eliminating the cancer is the primary goal of treatment, preserving the function of the nearby nerves, organs, and tissues is also very important. Overall, the main treatment options are surgery, radiation therapy, chemotherapy, targeted therapy and immunotherapy.

ICRO Courses are focused to showcase current advances in the rapidly evolving field of Oncology. There is a renewal of interest for training in Head & Neck cancers in the young postgraduate students hence conducting this 42nd ICRO SUN PG Teaching Programme on Head & Neck Cancers on the 3rd and 4th of Sept 2022 at Govt Cancer Hospital, MGM Medical College Indore. We have excellent faculties to impart their knowledge to Students and make them well prepared for their exams and for a better future.

Organising Institute

Indore popularly known as "AHILYA KI NAGARI" is the largest industrial and commercial centre and educational center of Madhya Pradesh (INDIA) and has advanced medical facilities. It has its own medical history dating back to 1848.

In the year 2028, we will be celebrating 150 years of M.G.M. Medical College. The 19th Annual National Conference of AROI was hosted by our institute in 1997.

Cancer Hospital established in May 1969 with all facilities available including "Remote Controlled after loading High Dose Cathetron" which was one of the first to be installed in Asia.

Govt Cancer Hospital is a 100 bedded, stand-alone Govt cancer centre in the heart of indore. The department of Radiation Oncology is currently functioning with one Cobalt Theratron 780 C, one microselectron HDR, chemotherapy, targeted therapy Palliative Care and bone marrow transplant Unit.

Our institute is registering 4000 new patients every year. Brachytherapy constitutes a good proportion of the departmental work with nearly 80-100 new patients being treated every year. Interstitial Brachytherapy in a wide range of sites, ICBT, ILBT and vaginal brachytherapy are routinely done.

On behalf of Govt Cancer hospital we invite you to attend the 42nd ICRO meeting on Head and Neck Cancers.
